

For integrators interested in getting client networks right the first time, RouterBox is the go to solution. Designed to be technology and brand agnostic, both the RBx100 and RBx700 come equipped out of the box ready to work with UniFi, Netgear, Araknis, Pakedge, and network gear. Our purpose built UI, RBxConnect offers configuration, notification and resolution functionality, making it not only a proactive monitoring tool, but a reactive tool that can self heal standard network issues.

For your high-end jobs requiring virtualization and gigabit internet speeds, the RBx700 is the perfect solution. The RBx100 will meet the needs of the other 90%.
